

# CABIN AIR FILTER – INSTALLATION INSTRUCTIONS

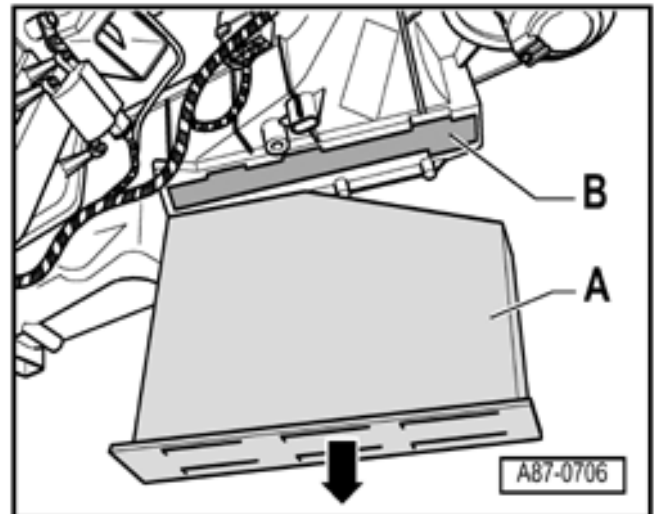

Part No.: **PC5586X**

Est. Installation Time: **less than 15 mins**

**Audi OE: 1K1-819-653-B; Volkswagen OE: 1K0 819 644 B**

The Cabin air filter is located under the dashboard on the passenger side

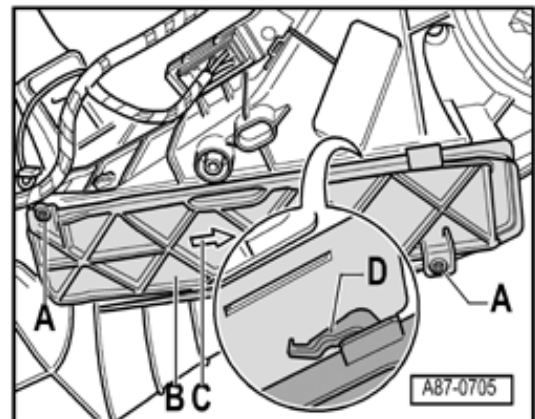

1. Locate the filter housing cover
2. Push and slid the cover to the right to remove it
3. Pull the old filter down
4. Push the new filter up into the housing. It will fit in only one orientation – See ==>
5. Reinstall the housing cover, by hooking it in the receiving slots and slide it to the left

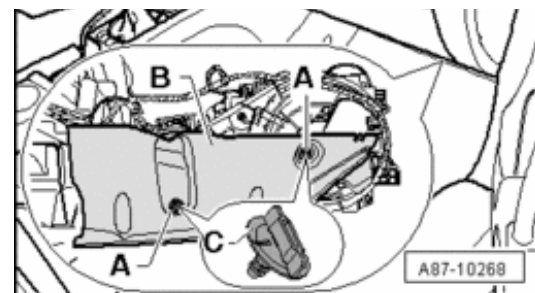

G004354.82

**Some application requires the following procedure**

1. Remove bolts -A- if necessary. See →
2. Bolt -A- is not installed on all vehicles. Bolts secure the cover -B- in the event the catches -D- no longer hold.
3. Push cover -B- in direction of -arrow C- and remove cover
4. Screw clips -A- are available in different versions. For example, -C- and -D-. See →
5. Remove filter element -A- from shaft -B- of air conditioner or heater.
6. Clean the surrounding area of the dust and pollen filter in air conditioner shaft or heating before installing a new filter. Using a vacuum cleaner, clean shaft -B- of A/C unit or heater. Install in reverse order of removal.
